

SAP Concur Endorsed App Premium Certified

Blue dot Tax Assurance

AI & ML-driven VAT recovery

About Blue dot

Blue dot's platform automatically processes travel and expense data, accounts payable transactions, invoices, and receipt images to maximize recovery of VAT, GST, and other consumption taxes.

We help global enterprises reduce risk, increase recovery, and replace manual processes with intelligent automation.

The challenge

VAT recovery is complex and resource-intensive, particularly for global organizations handling high volumes of expenses and cross-border transactions. Fragmented data, manual processes, and constantly changing regulations make it difficult to ensure compliance and maximize recovery.

The result is increased audit risk, operational strain, and significant unclaimed VAT—driving the need for a smarter, automated approach to VAT/GST management.

Fully Integrated with SAP Concur

Tax Assurance delivers automated validation, three-way matching, and full visibility into VAT recovery opportunities—enabling compliance, control, and efficiency in one unified solution.

Trusted by Global Leaders

Blue dot supports major global brands in transforming VAT recovery and tax compliance through proven AI technology. Our platform is trusted by multinational enterprises to deliver accuracy, scalability, and measurable financial impact across complex global operations.

Our solution

Blue dot Tax Assurance leverages advanced AI and machine learning to automate end-to-end VAT recovery—transforming manual, time-consuming processes into intelligent, scalable automation.

How it works

- Analyzes transaction-level data
- Validates each transaction against local tax regulations
- Identifies eligible VAT recovery opportunities with accuracy and consistency
- Reduces manual effort and administrative burden
- Enhances compliance while minimizing risk

Business Impact

- Maximize VAT recovery and unlock additional cash flow
- Reduce compliance risk and exposure to penalties
- Eliminate manual review and ongoing regulatory updates
- Improve operational efficiency for finance and tax teams
- Scale globally without increasing internal tax resources

Global Coverage. Local Compliance.

With over 96% country coverage of identified VAT/GST/HST potential across the Americas, EMEA, and APAC, the platform enables organizations to recover more VAT while staying compliant globally.
